

Speed controller MS EC

ÖSTBERG

MS EC for manual variable speed control of EC motors.

All fans with EC-motors from Östberg have 10 Vdc output that can be connected as supply to the controllers.

On the stepless control, Max and Min-mode can be set by adjustment screws under the knob.

On controllers with fixed locations (Steps 1-3 and Steps 0-3 Off-pos.), Pos. 1 and Pos. 2 are set by adjusting screws.

The controller is certified and approved as conforming to electrical safety and interference regulations on all markets.

Enclosure class:

Insert mounting IP 44

Surface mounting IP 54
